INCORPORATING PERENNIAL BERRIES AND FRUITS

WWW.CULTIVACTION.CA

Question?

What is a Perennial Plant?

What is a Perennial Plant?

Annual – Plant takes one year to complete its cycle (must be reseeded)

Biennial – Plant takes two year to complete its cycle (must be reseeded after two years)

Perennial – Plant lives for multiple years before its life cycle is complete

Hardiness Zones

Discussion

Do you want to incorporate perennial fruits and berries into the garden?

- If so, what types of fruits and berries do you like?
- What types of fruits and berries can we grow in Montreal's hardiness zone? Name as many as you can and tell us about them.

Walnuts

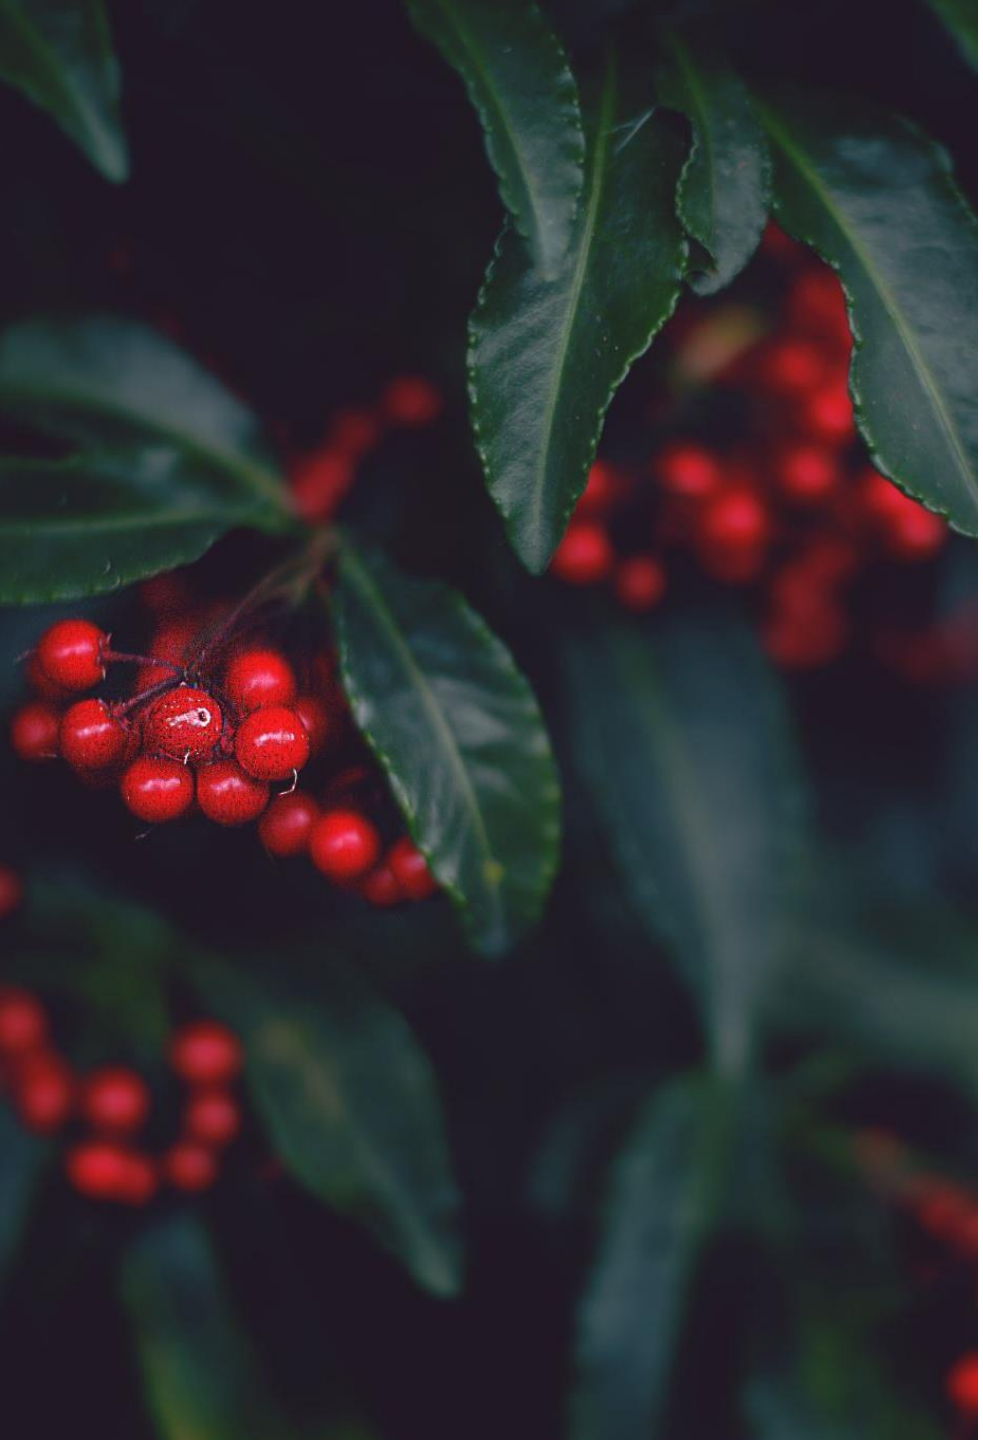
Hickory Nuts

Hazelnuts

Chestnuts

Hican Nuts

Blueberry



Discussion

What kind of berries would you add to your garden?

- What berries do you like eating?
- What storage/transformation capabilities do you have?
- What plants do you like?
  - Ornamental vs eating

Where would you grow your berries?

- How much space do you have?

How would you maintain your berry plants?

- What does your plant need to survive and thrive?

How will you acquire your berry plant?

- Propagate, from seed, buy from store, get from nature?

Thanks!
