

Who are the names of your group members?

- 1 – Identify ten types of edible plants.
- 2 – Identify three types of insects – are the insects harmful or beneficial for food production?
- 3 – Identify three weeds.
- 4 – Find a plant that is going to seed. What kind of plant is it?
- 5 – Identify three types of flowers.
- 6 – Identify one perennial plant.

Discussion question:

- 1 – According to Vandana Shiva, what are the people's and nature's economies? How can food production be thought of in terms of these economies?
- 2 – What is social reproduction? How is food and land essential to social reproduction?
- 3 – How can we measure the success of community gardens over and above how much food they produce?
- 4 – How can nature and food be considered a circular economy?
- 5 – How can you expand your capacity for social reproduction?
