

Economic Transformations in Capitalist Society

ERIK CHEVRIER

SEPTEMBER 12, 2024

Needs and Wants

Make a list of products that you need and want?

How do you know if a product can satisfy a real need?

Needs

Need – A condition within the person that is essential and necessary for growth, well-being and life.

Deficiency needs – Are responses to a state of deprivation and generate tension-packed, urgency-laden emotions, such as pain, relief, anxiety, frustration, stress, etc....

Growth needs – Gently guide behaviour toward a developmental trajectory of growth and well-being. They typically generate positive emotions, such as interest, enjoyment, hope and vitality.

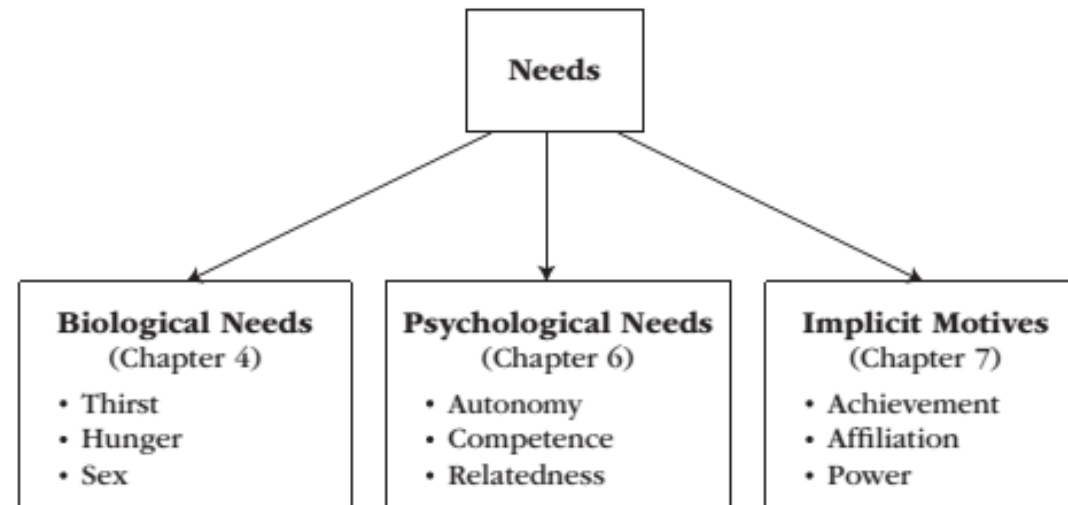

Figure 4.2 Types of Needs

Needs

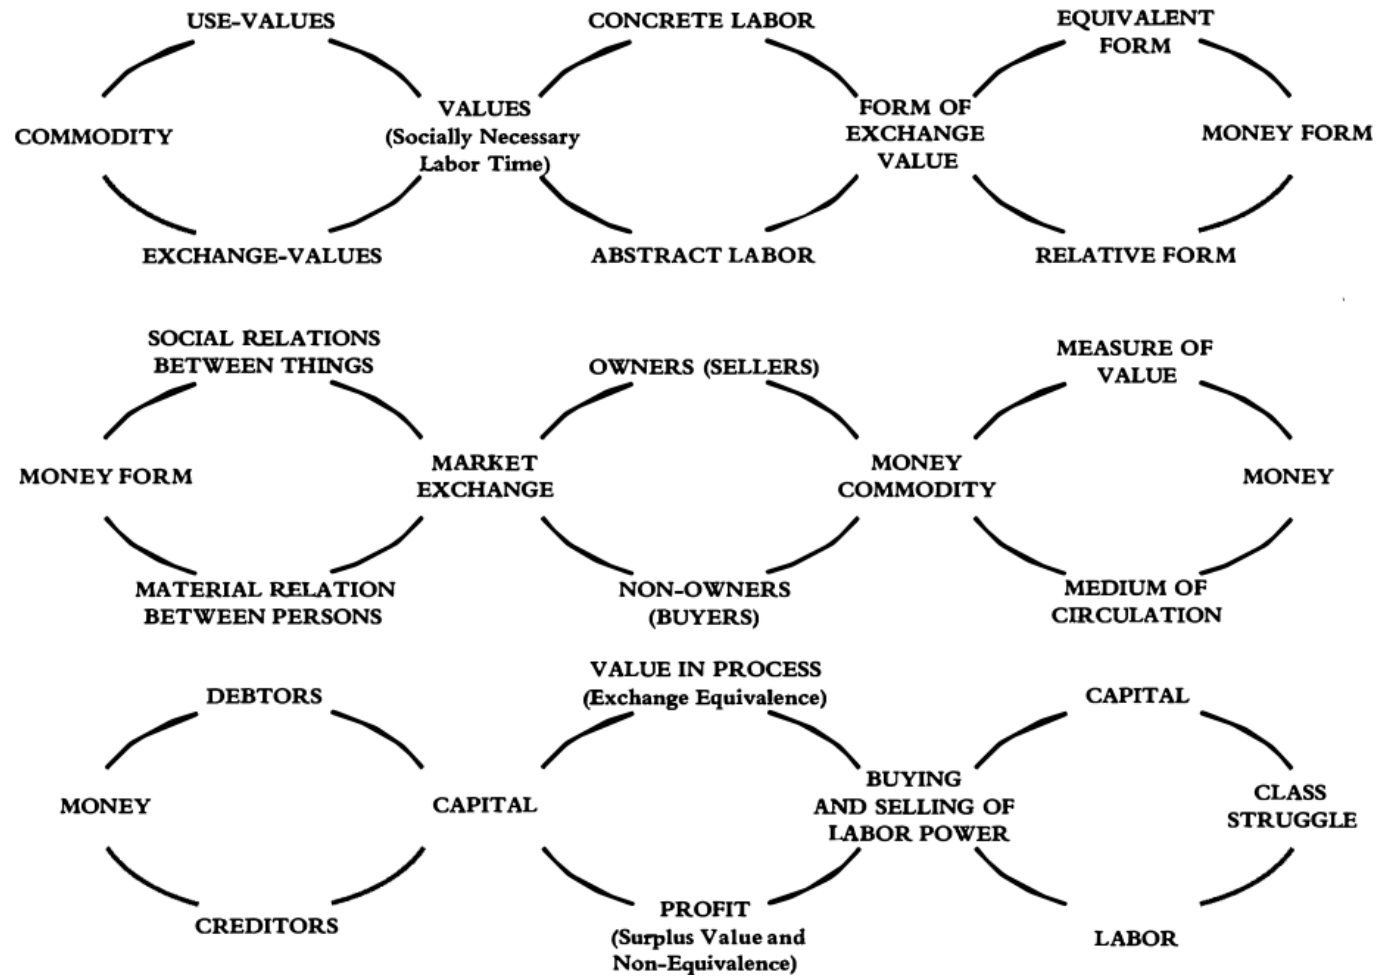

Table 4.1 Three Types of Needs with Their Definitions and Examples

Type of Need	Definition, with Examples
Physiological	A biological condition within the organism that synchronizes brain structures, hormones, and major organs to regulate bodily well-being and to correct bodily imbalances that are potential threats to growth, well-being, and life. Examples include thirst, hunger, and sex.
Psychological	An inherent (inborn) psychological process that underlies the proactive desire to seek out interactions with the environment that can promote personal growth, social development, and psychological well-being. Examples include autonomy, competence, and relatedness.
Implicit	A developmentally acquired (socialized) psychological process to seek out and spend time interacting with those environmental events associated with positive emotion during one's socialization history. Examples include achievement, affiliation, and power.
